# See the dentist at your workplace

- easy and convenient for both employer and employee

## Dentist at your workplace

We bring dentistry to the workplace to make it easy and convenient for the employees to get preventive and restorative dental care in a busy work day.

MobileDentalClinic.dk (Tandlægebussen.com)

- The employees pay for their treatment themselves, just like at an ordinary clinic.
- A higher degree of work-life balance for the employees.
- A natural supplement to the many other employee and health benefits.
- Enhanced productivity and less absence from the company.
- Healthy and happy employees with a better performance and wellbeing – good oral care contribute to a good general health.
- Excellent professional treatments and patient services.
- We offer all kinds of common dental treatments.
- The company pays a small mobilisation fee per day of treatment.

## Practical information

We can visit the workplace as often as needed – once a month or more. Sometimes we can even come for just half a day. This will make it easier for your employees to get an appointment that fits into their work plans and daily life. The MobileDentalClinic, which is based on a large camper van, will be placed on a parking lot designated by the company. The camper van needs access to regular electric power and water supply only.

We do not have to refer the patients to other dentists, as our own dentists will be present at the workplace very often and can manage most all treatments in the mobile clinic.

- Online booking for the employees
- Opportunity to book an appointment to the dentist, hygienist, assorted examinations and treatments, respectively.
- Grants and/or subsidies from the Danish public health sector or from a health insurance such as Sygeforsikringen Danmark (if you are a member) apply - just like a traditional dental practice.
- The public "Dental Treatment Agreement" stipulates the prices of all preventive dental care, thus the prices are the same all over the country.
